### Biography:

Dr. Martin von Bergh is a practicing medical doctor, emergency physician and disaster manager with an executive business education (MBA) in International Hospital and Healthcare Management from the Frankfurt School of Business and Finance. He is the founder and managing director of a consulting and research company, “Von Bergh Global Medical Consulting”, which focuses specifically on emergency and disaster management consulting, providing assistance in improving emergency medical services as well as training for disaster preparedness and response.

Dr. von Bergh is a Advisory Board member of the Public Safety Communication Forum and chairman of the “Victim Safety Initiative” within the forum, as well as a member of “The International Emergency Management Society”.

Dr. von Bergh conducts emergency response in-field training and disaster drills for paramedics and emergency physicians. In his function as project manager he is currently producing the largest and most advanced ambulances in the world which offer several intensive and intermediate care units, as well as an operating theatre.
