TQC™ & TQAC™ Background and Development Process

Motivation

With an increasing number of disasters worldwide, resulting in more international collaboration and support to disaster stricken areas, the need for more education and training in international emergency and disaster management seems evident. TIEMS believes that it is important to raise the awareness of the competencies needed in emergency and disaster management, and to support those participating in these activities and operations in acquiring those competencies. This is TIEMS motivation for launching

TIEMS International Certifications - TQC & TQAC

Development Process

- ❑ The idea of a TIEMS International Certification emerged during the TIEMS 2006 Annual Conference in Korea
- ❑ Around 300 experts from more than 40 countries have, over time, been consulted during the TQC development process, by answering a questionnaire and participating in three workshops in Kiev, Manila, and Seoul; discussing and concluding the TQC concept
- ❑ Eight test candidates from 7 countries; Australia, China, Jordan, Nigeria, South Africa, India and USA; have tested the on-line TQC system from A to Z, giving valuable feedback on the quality, operational aspects, and relevance of TQC; thus, guiding TIEMS to attune TQC to the needs of the international emergency management and disaster response community
- ❑ When TQC was launched, TIEMS was soon approached by newly educated professionals, who had proper education but were lacking practical experience in emergency management. TQAC was then established as an additional TIEMS certification for those with proper education in emergency management but was lacking practical experience.

TIEMS International Certifications - TQC™ & TQAC™

TQC & TQAC For Whom:

- TQC is a certification for individual emergency managers with a nationally recognized professional certification or other individuals with documented competence and experience, practical or academic, in international emergency and disaster management
- TQAC is a certification for individuals with proper education in emergency management but who are lacking the practical experience as required for TQC
- TQC & TQAC only certify knowledge and competences about international standards, requirements, and best practices, necessary to create “an international common understanding” among those working with emergency and disaster management internationally

TQC & TQAC Objective:

TIEMS Believes that Internationally Focused Certifications will:

- Promote Global Competence in Emergency Management
- Share Best Practices
- Support International Collaboration
- Lead to an International Common language, Knowledge and Understanding of Emergency and Disaster Management

<https://www.tiems.info/index.php/education/overview>

TQC™ & TQAC™ Process

TQC & TQAC can act as the facilitator element in the cooperation's efforts between countries and organizations using a common language and a common knowledge and understanding of international emergency management and disaster response
